## Section 5- Fire Fighting Measures

**Fire/Explosion Hazard:** Non-flammable.

**Hazardous Combustion Products:** During fire, gases hazardous to health may be formed. Explosion hazard: Avoid generating dust; fine dust dispersed in air in sufficient concentrations and in the presence of an ignition source is a potential dust explosion hazard.

**Extinguishing Media:** Water fog. Foam. Dry chemical powder. Carbon dioxide (CO<sub>2</sub>). Apply extinguishing media carefully to avoid creating airborne dust. Do not use water jet as an extinguisher, as this will spread the fire.

## Section 6 - Accidental Release Measures

### Methods and materials for containment and cleaning

Ensure adequate ventilation. Avoid the generation of dusts during clean-up. ELIMINATE all ignition sources (no smoking, flares, sparks or flames in immediate area). Prevent product from entering drains.

**Large Spills:** Stop the flow of material, if this is without risk. Collect spill with an inert, non-combustible absorbent material and transfer to labelled container for disposal. Clean contaminated surface thoroughly. Prevent release to the environment.

**Small Spills:** Wipe up with a damp cloth and place in container for disposal. Clean surface thoroughly to remove residual contamination.

## Section 7 - Handling and Storage

**Handling:** Keep exposure to this product to a minimum, and minimise the quantities kept in work areas. Check Section 8 of this SDS for details of personal protective measures, and make sure that those measures are followed. The measures detailed below under "Storage" should be followed during handling in order to minimise risks to persons using the product in the workplace. Also, avoid contact or contamination of product with incompatible materials listed in Section 10 (if any).

**Storage:** Store below 30°C (Room Temperature). PROTECT FROM MOISTURE. Store opened bag in a dry place to prevent caking.

## Section 8 - Exposure Controls / Personal Protection

### National Exposure Standards:

Ingredient	Type	Value
Lincomycin hydrochloride	TWA	100µg/m <sup>3</sup>
Spectinomycin sulfate tetrahydrate	TWA	2000µg/m <sup>3</sup>

**Biological Limit Values:** No biological limit allocated.

**Engineering Controls:** Use only in well ventilated areas or outdoors.

### Personal Protective Equipment:

**Eye/face protection:** Eye protection is not normally required under normal product. However, if in doubt, wear suitable protective glasses or goggles.
